EVANDRI RIDHO HASMONO

Bekasi, West Java | +6281296957950 | evandriridhoh@gmail.com | linkedin.com/in/evandriridho | github.com/evandri30

SUMMARY

Informatics graduate (GPA 3.85) and certified Associate Data Engineer with hands-on experience building internal data tools and APIs on PostgreSQL and MySQL. Writes SQL daily, from standard queries to vector similarity search, and uses Python and Looker Studio to process, analyze, and visualize data. Also brings full-stack development experience in PHP, Node.js, and React to support internal applications and data integration.

EDUCATION

Gunadarma University — Bachelor's Degree, Informatics Sep 2022 – Aug 2026

Bekasi, Indonesia | GPA: 3.85 / 4.00

- Coursework: Web Programming, Database Systems (SQL, Oracle, data modeling & normalization), Software Engineering

EXPERIENCE

Software Engineer Intern — Mahkamah Konstitusi Republik Indonesia Sep 2026 – Present

- Develop and maintain features for SIMPONI, an internal management system, using PHP with the Prado framework.
- Build internal data tools and APIs that retrieve and process data from PostgreSQL and MySQL databases.
- Write SQL queries daily, from standard queries to vector similarity search in PostgreSQL.

IT Intern, IT Solution Team — PT Pelita Air Service Nov 2025 – Jan 2026

- Contributed to the SparePart Monitoring application, digitizing a fully paper-based inventory process.
- Built internal web pages in Laravel Blade from Figma designs and connected them to the backend for real-time data.
- Collaborated via Git and Jira across the full SDLC, from requirement gathering to data integration.

PROJECTS

Tokopaedi — E-Commerce Data Analysis Aug 2026 – Sep 2026

- Bootcamp final project: analyzed e-commerce sales data with SQL and Python, visualized in a Looker Studio dashboard.

DeteksiSIBI — Real-Time Sign Language Detection May 2026 – Jul 2026

- Built a real-time SIBI sign language detection system: trained a YOLOv8 model (98.34% precision, 98.62% recall, 98.23% mAP50) served via FastAPI + PostgreSQL with a React.js webcam frontend.

Tomato Leaf Disease Classifier Mar 2026 – Apr 2026

- Trained a MobileNetV2 classifier (90.5% accuracy) with data preprocessing, augmentation, and a Streamlit web app.

Bank Lead Intelligence Portal (BLIP) Oct 2025 – Dec 2025

- Built the frontend for a MERN-based internal sales platform delivering AI-driven customer recommendations; refactored backend integration with FastAPI-based AI services and contributed to overall tech stack decisions.

Rizquna Bakery — Full-Stack Ordering Platform Mar 2025 – Aug 2025

- Built a full-stack MERN bakery ordering platform as a capstone project: product management, authentication, shopping cart, Midtrans payment integration, and an admin dashboard for order/delivery tracking.

CERTIFICATIONS

- React & Backend with AI — Dicoding, Jan 14, 2026
- Associate Data Engineer — Universitas Gunadarma, Jun 6, 2026
- Data Analysis: Full Stack Intensive Bootcamp — MySkills, Jul 29, 2026

SKILLS

Languages & Frameworks: JavaScript, TypeScript, PHP, Python, Node.js, Express.js, Laravel, FastAPI, React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap, Sass

Data & Tools: MongoDB, MySQL, PostgreSQL, Prisma, Git, GitHub, Postman, ESLint, Bash, Docker, Figma

Soft Skills: Problem Solving, Teamwork, Communication, Critical Thinking, Self-Learning, Adaptability, Time Management

Languages: Indonesian (Native), English (Professional)
