EVANDRI RIDHO HASMONO

Bekasi, West Java | +6281296957950 | evandriridhoh@gmail.com | linkedin.com/in/evandriridho | github.com/evandri30

SUMMARY

Software engineer with hands-on experience across the TypeScript, Python, and PHP/Laravel stacks, building full-stack web applications from database design through frontend delivery. Comfortable working end-to-end on a problem, from data modeling to system design to production deployment. Currently sharpening skills in scalable backend architecture and applied data science through independent projects.

EXPERIENCE

Software Engineer Intern — Mahkamah Konstitusi Republik Indonesia Sep 2026 – Present

- Develop and maintain features for SIMPONI, an internal management system, using PHP with the Prado framework.
- Build internal data tools and APIs that retrieve and process data from PostgreSQL and MySQL databases.
- Write SQL queries daily, from standard queries to vector similarity search in PostgreSQL.
- **Grading AI:** Develop a dashboard with Next.js, FastAPI, PostgreSQL, Redis, and Docker that lets AI pre-grade user answers in batches as a first-pass assessment.

Frontend Engineer Intern — PT Pelita Air Service Nov 2025 – Jan 2026

- Contributed to the SparePart Monitoring application, digitizing a fully paper-based inventory process.
- Developed internal web interfaces in Laravel Blade, translating Figma UI/UX designs into pages including login & signup, home page, navigation, and settings, and connected these pages to the backend for real-time data.
- Collaborated with the development team using Git for version control/branching and Jira for sprint task tracking, working through the full SDLC from requirement gathering to frontend implementation and data integration.

PROJECTS

DeteksiSIBI — Real-Time Sign Language Detection May 2026 – Jul 2026

- Built a full-stack real-time SIBI sign language detection system: trained a YOLOv8 model (98.34% precision, 98.62% recall, 98.23% mAP50) and deployed it via FastAPI + PostgreSQL with a React.js frontend for webcam-based detection.

Tomato Leaf Disease Classifier Mar 2026 – Apr 2026

- Built an end-to-end tomato disease classification system using transfer learning with MobileNetV2 (90.5% accuracy), covering data preprocessing, augmentation, and deployment as an interactive Streamlit web app.

Bank Lead Intelligence Portal (BLIP) Oct 2025 – Dec 2025

- Built the frontend for a MERN-based internal sales platform delivering AI-driven customer recommendations; refactored backend integration with FastAPI-based AI services and contributed to overall tech stack decisions.

Rizquna Bakery — Full-Stack Ordering Platform Mar 2025 – Aug 2025

- Built a full-stack MERN bakery ordering platform as a capstone project: product management, authentication, shopping cart, Midtrans payment integration, and an admin dashboard for order/delivery tracking.

EDUCATION

Gunadarma University — Bachelor's Degree, Informatics Sep 2022 – Aug 2026

Bekasi, Indonesia | GPA: 3.85 / 4.00

- **Thesis:** Development of a Web-Based SIBI Sign Language Detection System Using YOLOv8 with CRISP-DM
- **Tech Stack:** React.js, TypeScript, FastAPI, Python, YOLOv8, PostgreSQL, Docker

SKILLS

Languages & Frameworks: JavaScript, TypeScript, PHP, Python, Node.js, Express.js, Laravel, Prado, FastAPI, React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap, Sass

Data & Tools: MongoDB, MySQL, PostgreSQL, Redis, Prisma, Git, GitHub, Postman, ESLint, Bash, Docker, Figma

Soft Skills: Problem Solving, Teamwork, Communication, Critical Thinking, Self-Learning, Adaptability, Time Management

Languages: Indonesian (Native), English (Professional)

CERTIFICATIONS

- **React & Backend with AI** — Dicoding, Jan 14, 2026
- **Associate Data Engineer** — BNSP, Jun 6, 2026
- **Data Analysis: Full Stack Intensive Bootcamp** — MySkills, Jul 29, 2026
